

COB-OLGY TEMPERATURE TAG

~ **MINI**

Introducing our latest product, the
Wireless Temperature Tag (Mini)

A compact, effective solution
to monitor temperature during
live animal transportation.

- ✓ Temperature Range: -20°C to 60°C (Accuracy $\pm 0.5^\circ\text{C}$)
- ✓ Tag Size: 32.5 × 28.8 mm, thickness 6.7 mm
- ✓ Waterproof Rating: IP67 – durable and reliable even in challenging conditions
- ✓ Wireless Technology: Bluetooth Low Energy (BLE)
- ✓ Broadcast Interval: Updates temperature every second
- ✓ Battery Type: Single CR2032 coin battery, lasting up to 60 days

A Perfect Addition to Our Animal Shippers

These mini tags easily slide behind a filter screen on our IATA compliant Animal Shippers of any size, ensuring animals cannot access them while providing accurate monitoring throughout transit. With the free mobile app, you can quickly scan each tag, set up reporting, and download a full journey report in PDF format upon arrival. This ease of tracking and reporting ensures seamless, reliable documentation for every trip, making it an ideal solution for one-way shipments.

Why Temperature Monitoring Matters

Animals are sensitive to temperature changes, and consistent monitoring helps to maintain optimal conditions for their welfare. With this new Temperature Tag, you'll have a complete record of temperature data upon arrival, enabling you to review each journey. If temperature issues are identified after transit, you can use this data to adjust transport conditions, routes, or handling practices for future shipments, helping to refine protocols and create more consistent, comfortable transit conditions.
